

Knowledge Organiser- Science Year 2- Living Things in Their Environment

Key Vocabulary	Definition
Alive	A plant or animal that is alive moves, grows and reproduces.
Dead	Something that was a living thing but is no longer alive.
Habitat	A place where plants or animals live
Microhabitat	A very small part of a bigger habitat, with a special feature such as woodlice living under stones in a garden
Adaptation	Many plants and animals have adapted so they suit a particular habitat.
Food chain	A food chain is a diagram which shows us how animals are linked by what they eat, and what eats them
Producer	Plants are called producers because they produce their own food. Most food chains start with a producer (plant) that is eaten
Consumer	A consumer is a plant/animal that eats another plant or animal

A microhabitat

Earthworms help to break down dead matter and provide nutrients for the soil.
