

Three stars -
Tuesday 12th January 2021

1.

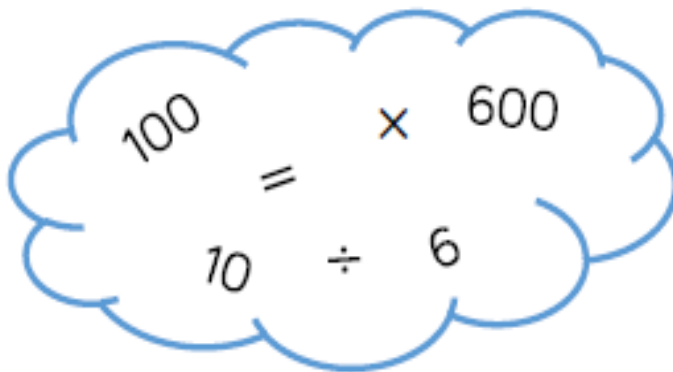

Always, Sometimes, Never

If a number is a multiple of 3 it is also a multiple of 6

Explain why you think this.

2.

Choose the correct number or symbol from the cloud to fill in the boxes.

$$\underline{\quad} \div \underline{\quad} = 6$$

$$60 = 600 \underline{\quad} 10$$

Answers

Sometimes.
Every even
multiple of 3 is a
multiple of 6, but
the odd multiples
of 3 are not
multiples of 6

$$600 \div 100 = 6$$

$$60 = 600 \div 10$$
